

# Product Information & Features

GILBERTSON & PAGE LTD.

Established in 1873.

# Dr. John PUPPY

**A complete food formulated for all puppies of sporting & working breeds.**

- Rich in chicken (22%).
- Balanced for growth with optimum levels of protein & bone minerals.

**STATUTORY STATEMENT** Dr. John Puppy is a complete feeding stuff specifically for puppies of sporting & working breeds.

**DIRECTIONS FOR USE** At weaning, Dr. John Puppy can be introduced gradually as a porridge (leave one part Dr. John Puppy and three parts warm water to soak before blending to a porridge consistency). Offer small amounts 4-6 times per day for periods of 15-20 minutes. If the puppies empty the bowl, increase the feed by a small amount until weaning is complete.

Post weaning or for new puppy owners, follow the daily feeding guide overleaf (showing the total amount to feed each day in 3-4 meals), either dry or moistened with water. Then move gradually onto a junior food at half adult size (we recommend Dr. John Titanium). If changing your puppy's diet to Dr. John Puppy, introduce it gradually over a few days until it replaces all other growth food. When bringing your puppy home for the first time, allow him/her to adjust to the home environment for at least a week before changing the diet. Always ensure that there is plenty of clean, fresh water available for your puppy to drink. When this pack is not in use, fold down top and store in a cool dry place.

**COMPOSITION** Cereals, meat and animal derivatives (minimum 22% chicken), oils and fats (minimum 1.25% fish oil), vegetable derivatives, minerals, seeds.

Available sizes: 2kg & 10kg

<b>ANALYTICAL CONSTITUENTS</b>	<b>AMOUNT</b>
Crude Protein	27%
Crude Oils & Fats	15%
Crude Fibres	2.5%
